

**LIST OF TABLES**

Table 1.1	NUF Monthly Dry Weight Production (2013 – 2018)
Table 1.1	Coordinates of the LAMP site and the NUF Secure Landfill
Table 1.2a	EIA Study Team (EIA Consultant)
Table 1.2b	Other Technical Consultants
Table 3.1	Minimum Safety Factor per ANCOLD Guidelines
Table 3.2	List of companies licensed to occupy and operate a prescribed premise in Malaysia
Table 5.1	Coordinates of proposed Project and existing LAMP site
Table 5.2	List of Major Equipment at the LAMP Site
Table 5.3	Key Information of Cracking and Separation Plant
Table 5.4	Key Information of Solvent Extraction Plant
Table 5.5	Key Information of Product Finishing Plant
Table 5.6	Results of the NUF TCLP Analysis
Table 5.7	Results of NUF TTLC Analysis
Table 5.8	Cross Section Area of DSF 2 and Subsequent Secure Landfill
Table 5.9	Minimum Factor of Safety Specified by the ANCOLD Guidelines
Table 5.10	Testing Methods to be Employed for DSF Structural Design
Table 5.11	Compliance to Slope Stability in the DSF Structural Design
Table 5.12	Wastewater Control and Monitoring Plan
Table 5.13	Summary of Research Carried Out by Lynas for Commercialisation
Table 6.1	Characteristics of Kuantan Series Soil According to Depths
Table 6.2	Summary of Boreholes Data for the Project Site
Table 6.3	Summary of Stratigraphy Soil Layers at Project Site
Table 6.4	Summary of Hydraulic Conductivity of Soils
Table 6.5	Mean Monthly Temperature and Relative Humidity
Table 6.6	Mean Monthly Rainfall and Rain Days
Table 6.7	Surface Wind Speed in Kuantan
Table 6.8	Types of Scheduled Wastes Generated
Table 6.9	Environmental Sensitive Levels
Table 6.10	Common Criteria of the Composite Analysis
Table 6.11	Surrounding Land Use within 5-km of the Project Site
Table 6.12	Baseline Demographic Profile of Pahang, 2010
Table 6.13	Baseline Demographics Profile of Kuantan District
Table 6.14	Malaysian Ambient Air Quality Standard 2013
Table 6.15	Existing Ambient Air Quality Monitoring Locations and Parameters
Table 6.16	Ambient Air Quality Monitoring Results
Table 6.17	Stack CEMS Monthly Average Results for 2013 - 2018

Table 6.18	Existing Water Quality Monitoring Stations and Parameters
Table 6.19	Summary of Water Quality Monitoring Results
Table 6.20	Location and Parameters for the Final Discharge
Table 6.21	Summary of Effluent Quality at the Final Discharge Point
Table 6.22	Existing Groundwater Monitoring Locations and Parameters
Table 6.23	Noise Level Monitoring Stations and Parameters
Table 6.24	Summary on Noise Level Monitoring
Table 7.4.1	Parameter values used for constant head boundary (CHB)
Table 7.4.2	Summary of Flow Parameters Applied in the Groundwater Flow Model for the Project Site for Model 1 and 2
Table 7.4.3	Summary of Storage Values Applied in the Groundwater Flow Model for the Study Area (Model 1 and 2)
Table 7.4.4	Solute/Contaminants Transport Parameters Applied in the Models for the Study Area (Model 1 and 2)
Table 7.4.5	Parameter values applied to contaminants recharge boundary conditions in the model
Table 7.4.6	Summary of calibration results for the numerical groundwater
Table 7.5.1	Predicted Maximum Average Incremental Concentration (MAICs) for Particulate Matters (in $\mu\text{g}/\text{m}^3$ )
Table 7.6.1	Sound Pressure Levels of Construction Machinery and Vehicles <sup>1</sup>
Table 7.7.1	Communities Located within the Zone of Impact (ZOI)
Table 7.7.2	Social Impact Assessment of the Project
