

About the contributors

Dr Susan Baker is Senior Research Fellow in European Social Research at the University of Wales in Cardiff, UK. Her primary research interest is in environmental policy and politics at the EU level and she is currently engaged in a study of the implementation of sustainable development policies in a European context. Another research interest of hers is the gender-specific dimension of environmental policy. Her most recent publications include *Protecting the Periphery: Environmental Policy in Peripheral Regions of the European Union* (edited with K. Milton and S. Yearley), published by Frank Cass, London; 'Environmental policy of the European Community: a critical review', *Kent Journal of International Relations*; and 'Environmental policy in the European Union: institutional dilemmas and democratic practice' (in W. Lafferty and J. Meadowcroft (eds.), *Environment and Democracy*, Edward Elgar).

Professor Andrew Blowers is Professor of Social Sciences (Planning) at the Open University, UK. Most of his teaching, research and publications have been in the fields of environmental planning, politics and policy. He is particularly concerned with the politics of sustainable development and the problems of radioactive waste. Among the books he has written are *The Limits of Power*, *Something in the Air* and *The International Politics of Nuclear Waste* (as a co-author); he has also edited *Planning for a Sustainable Environment*. As a former Dean and Pro-Vice-Chancellor of the Open University, Professor Blowers is currently Chairman of the Interfaculty Studies Board. He is also a member of the government's Radioactive Waste Management Advisory Committee (RWMAC), a former Vice-Chair of the Town and Country Planning Association and has served as an elected county councillor in Bedfordshire since 1973.

Dr Gerrit Faber is Associate Professor of International Economics at Utrecht University, The Netherlands. His main research interests are trade policy issues related to European integration and Third World development. He has published widely on these subjects. He is a member of the Dutch National Advisory Council on Development Co-operation.

Dr Pieter Glasbergen is Professor of Environmental Studies (Policy and Management) at both the University of Utrecht, The Netherlands, and the Dutch Open University. He specialises in planning and policy issues, with particular reference to environmental policy, physical planning, water management and landscape and nature conservation. He has conducted research for various government bodies, including the Ministry of the Environment, the National Physical Planning Agency and the Ministry of Public Works and Water Management. Dr Glasbergen has authored, co-authored

and edited 12 books. He recently edited the fourth edition of *Milieubeleid; een beleidswetenschappelijke inleiding* (*Environmental Policy: A Planner's Perspective*), Vuga Publishers, and *Managing Environmental Disputes. Network Management as an Alternative*, Kluwer Academic Publishers. He chairs the Environmental Policy Section of the Dutch Institute for Physical Planning and Housing.

Professor Kenneth Hanf is Royal Dutch Heidemij Professor of Environmental Management at Nijenrode University (The Netherlands School of Business) and a Senior Lecturer in Public Administration at Erasmus University, Rotterdam (both in The Netherlands). He is primarily interested in issues involving multilevel policy implementation. His current research activities range from an examination of changing governmentbusiness relations with regard to environmental regulation to a study of the formation and development of the international regime for the regulation of the long-range transport of air pollutants (otherwise known as 'acid rain'). Professor Hanf is one of the editors of *Environmental Policy and Administration in Europe*, published by Harvester Wheatsheaf.

Henk C. van Latesteijn is Deputy Staff Director of the Dutch Scientific Council for Government Policy. He has published on a number of environmental issues (including impact assessment, monitoring and policies), as well as on agricultural issues (such as land use policies and long-term analysis). He is particularly interested in methodological approaches to research and has also published on this topic.

Dr Pieter Leroy is Professor of Social and Political Sciences of the Environment at the Faculty of Policy Studies, University of Nijmegen, The Netherlands. His chief interest is in the spatial aspects of environmental problems and in the formulation and evaluation of environmental policy, particularly in relation to physical planning. He has published on environmental policy in both The Netherlands and Belgium. In 1994, he edited, with Professor K. Bouwer, *Milieu en ruimte: analyse en beleid* (*Space and the environment: Analysis and Policy*), a book (in Dutch) on environmental policy and physical planning. He recently published a book entitled *Environmental Science as a Vocation*.

Dr Martin List is Assistant Professor of International Relations and Comparative Politics at Fernuniversität Hagen, Germany's Open University. His main interests include international environmental policy and public international law. Relevant publications of his include *Umweltschutz in zwei Meeren* (*Environmental Protection of Two Seas*), Tuduv, Munich; 'Regime theory and international environmental management' (together with V. Rittberger) in A. Hurrell and B. Kingsbury (eds) *The International Politics of the Environment*, OUP, Oxford; and 'Nuclear safety in Eastern Europe and the former Soviet Union' (together with B. Connolly) in R.O. Keohane (ed.) *Institutions for Environmental Aid: Pitfalls and Promise*, Cambridge, Mass, MIT Press.

Dr David Potter is Professor of Political Science at the Open University in the UK. His current research interest is the advocacy work of NGOs in relation to the environmental policies of nation states and transnational corporations in Asia. He edits the *Journal of Commonwealth and Comparative Policies*. A recent publication of his is 'Democratization in Asia' in D. Held (ed.), *Prospects for Democracy*, Polity Press, Cambridge.

Dr Colin Sage is a Lecturer in International Environmental Policy at Wye College, University of London, UK. He currently has research interests in Indonesia, Mexico, Bolivia and China; these centre primarily upon issues of rural resource management and livelihood security. He recently co-edited (with Michael Redclift) *Strategies for Sustainable Development: Local Agendas for the South*, John Wiley & Sons, Chichester, UK.

Jan Schoonenboom is a senior member of the Dutch Scientific Council for Government Policy and part-time Professor of Future Research at the Agricultural University of Wageningen, The Netherlands. His publications cover a wide range of subjects such as immigration, the labour market, the mass media, future research and the environment.

Dr Gerrit H. Vonkeman is a chemist by training, with a long experience in international environmental policy. He is presently Director of the Institute for European Environmental Policy, Brussels, and part-time Professor for International Environmental Policy at the Environment Department of Utrecht University, The Netherlands. His publications cover a wide range of subjects. He is particularly interested in fundamental, long-term solutions for international environmental problems.

Richard Welford is Professor of Business Economics at the University of Huddersfield and Director of the Centre for Corporate Environmental Management, both in the UK. He has written widely on issues relating to business and the environment and is the editor of *Business Strategy and the Environment*.
