

Subject Index

- abundance 15, 99, 104, 155, 413, 424, 426, 428, 431
- accumulation 41, 52, 54, 59, 235, 332, 338, 354, 413
- algae 40, 41, 49, 51–53, 59, 76, 96, 155, 205, 289, 338, 357, 358, 426–428, 431
- anammox 335, 341
- anoxia 14, 15, 18, 53, 318
- aquaculture production 47, 48
- aquatic biogeochemistry 69, 71, 73, 76, 83
- arbuscular mycorrhiza 95, 96
- ASEAN 233, 240, 242, 257

- benthic invertebrates 428
- biodiversity 27, 28, 32, 36, 116, 149, 150, 169, 170, 172, 173, 230, 233, 237, 246, 436, 440
- biodiversity protection 45
- biogeochemistry 87
- biomass production 27, 36, 39, 264
- bio-retention/infiltration system 385, 387, 392–394, 396, 397
- biota 8, 115, 118, 120, 123, 127, 131, 133, 149, 170, 288, 312, 356, 402, 405
- buffer strip 385, 387, 391, 394

- canal 12, 13, 41, 131–133, 135, 137–139, 187, 188
- cattail 285, 288, 296, 298, 302, 304, 308, 414–416, 422, 428

- characteristics 83, 87, 88, 107, 163, 170, 178, 180, 187, 214, 222, 224, 297, 307, 315, 331, 340, 353, 373, 384, 435
- Chesapeake Bay 3–5, 13–15, 17–22
- China 22, 27–29, 32–34, 46, 48–50, 53, 54, 58–62, 69, 128, 146, 147, 149, 154, 155, 161, 163, 167–169, 171–173, 177, 178, 180, 183, 184, 190, 202, 203, 218, 219, 230, 256, 408, 413, 414, 424, 433, 443, 445
- coastal 3, 4, 6, 17, 19–22, 27, 29, 33, 36, 40, 45, 54, 60, 115, 118, 127, 146, 155, 158, 164, 172, 177, 180, 195, 233, 234, 236–241, 244–247, 249–255, 257–259, 263
- commissioning 347–349, 356
- constructed wetlands 283, 285, 286, 299, 302, 307, 311, 312, 314, 315, 317, 318, 322, 323, 327, 331–337, 339, 341, 343, 344, 347, 350–353, 355, 356, 358, 361, 363, 365, 367, 371–376, 378, 380, 386, 394, 401, 402, 405–407, 409, 411
- cost–benefit analysis 250, 265
- countermeasures 32

- damages 169, 171
- Deep Bay 69–71, 73, 115, 116, 118–120, 123, 125–127, 146–150, 155, 156, 158, 177, 401–407, 409, 411, 435

- degradation 27–29, 32, 58, 69, 71, 76, 79, 163, 183, 205, 209, 218, 234, 243, 246, 251, 291, 402
- denitrification 16, 166, 290, 308, 331, 332, 334–336, 338–341, 344
- design criteria 293, 352, 361, 373, 375, 376, 443
- diversity 18, 19, 27, 28, 32, 36, 45, 95, 97, 108, 109, 116, 149–151, 154, 155, 169, 170, 172, 173, 224, 227, 228, 230, 233, 235, 237, 246, 257, 258, 264, 314, 315, 317, 318, 320, 321, 353, 355, 401, 402, 413, 424–428, 431, 436, 440
- driving forces–states–responses 186, 218
- dyke-pond system 47, 49

- East China 183, 190, 202, 218
- ecological benefits 32, 221, 222, 224, 230
- ecological succession 413, 424
- economic valuation 233, 249, 263, 265
- economic value 59, 166, 173, 242, 243, 250, 265, 266
- ecotoxicology 48, 59
- emergent plants 288, 313, 321, 331
- environmental impacts of inland aquaculture 55
- environmental problem solving 4
- eutrophic 13, 16, 54, 104, 106, 107, 178, 199, 202, 203, 205, 209, 213, 216, 218, 317, 333, 378

- Fanchang County 221–223, 225–228, 230
- free water surface 285, 286, 289, 292, 331, 361
- functions 1, 27, 28, 32, 35, 39, 46, 107, 108, 162, 164, 165, 167, 170, 172, 180, 185, 215, 219, 221, 224, 228, 250, 263–265, 286, 287, 312, 332, 358, 397, 419, 435, 437, 439, 441–443, 446

- Glomales 95, 96
- good aquaculture practices 48, 62
- grass swale 385, 387, 391, 393, 394
- greenhouse gas emission 36, 43
- gross pollutants 314, 347, 348, 386

- harmful algal blooms 11, 18–20
- heavy metal mobility 69, 71, 72, 79, 83
- heavy metals 47, 54, 58, 71, 72, 76, 79, 81, 83, 133, 167, 290, 302, 354, 414
- herons and egrets 125, 156
- highway runoff 361, 364, 368–370, 372, 374, 379, 380, 405
- Hong Kong 49, 53, 54, 62, 69, 84, 109, 115, 116, 118, 119, 123, 126–128, 145–151, 153–155, 157–159, 161, 163, 170–173, 177, 401–405, 408, 433, 435, 436, 439–445
- human disturbance 159, 170, 177, 178, 442
- human–water interactions 183, 209, 218, 219
- hydrophytes 98, 108, 205, 415

- ICAM 234, 257
- influencing factors 29
- integrated agriculture–aquaculture system 50, 51
- iron plaque 88, 89
- Italian poplar afforestation 221

- Jiangsu province 27, 33, 34, 183, 190, 192, 193, 206, 210, 211

- Liaohe Delta 35, 36, 38–41, 43, 45, 46
- macrophytes 95, 98, 101, 104–107, 109, 332, 338, 354, 368
- Mai Po 145–148, 150–159
- Mai Po and Inner Deep Bay Ramsar site 116, 120
- maintenance 48, 118, 150, 234, 264, 287, 300, 301, 324, 326, 347–355, 357, 358, 365, 387, 413, 443, 444

- management 3–5, 10, 13, 19–22, 32, 33, 52, 54, 60, 62, 69, 71, 83, 95, 96, 108, 123, 127, 145–159, 163, 170, 172, 178, 180, 183, 209–211, 215, 216, 218, 229, 233, 234, 243–247, 249–255, 257–260, 263–266, 300, 301, 317, 318, 321, 326, 327, 341, 347, 348, 350–357, 373, 383, 385–387, 391, 393, 397, 398, 444
- management conflicts 146
- management issues 4, 54, 233, 246, 258, 347, 353, 354, 385
- mangrove 5, 6, 11, 29, 69, 71, 73, 83, 118, 119, 123, 145, 146, 149, 151, 152, 154, 155, 158, 159, 161, 163–173, 177, 178, 180, 233–238, 240, 241, 243–247, 249–252, 258, 263–268, 271, 273, 276, 402
- mangrove ecosystem 161, 169, 170, 236, 243, 263
- mangrove wetland 166
- metal 47, 54, 58, 69, 71, 72, 76, 81, 83, 87–93, 115, 118, 120, 123, 127, 131, 133–140, 167, 285, 288, 290, 302, 332, 354, 363–365, 367, 370, 378, 405, 413, 414, 416, 417, 419, 422–425, 428, 431
- metal removal 364, 370, 416
- Moreton Bay 3–5, 8–10, 19
- mycorrhizoremediation 106
- nature reserve 45, 54, 69, 115, 116, 119, 120, 145, 146, 148, 153, 159, 169, 170, 172, 178, 403
- nitrification 71, 290, 300, 304, 308, 331–336, 338, 340, 341, 344
- nitrogen 11, 13, 15, 18, 40, 41, 43, 50, 166, 167, 197, 205, 216, 223, 285, 288, 290, 296, 297, 300, 331–334, 336, 338, 340, 341, 367, 404, 414
- nutrients 5, 8, 10, 11, 13, 14, 17, 18, 33, 41, 43, 47–50, 53, 71, 108, 109, 161, 167, 205, 223, 229, 264, 266, 315, 323, 324, 332, 334, 338, 357, 358, 369, 378, 384
- oligotrophic 104, 106, 107
- operation 49, 149, 154, 252, 287, 300–302, 308, 311, 347–353, 355, 358, 362, 397, 398, 405, 407, 410, 413, 444, 446
- operation and maintenance plans 349–351
- organic fish farming 48, 59, 60, 62
- organic matter degradation 69, 76, 79
- organics 62, 131, 133, 139, 285, 288, 290, 297, 374, 378
- organic wastes 47, 59, 61
- organics removal 290
- over-exploitation 28, 241
- Pb/Zn mine drainage 431
- performance 60, 90, 253, 291, 301, 302, 304, 311, 314, 336, 337, 342, 343, 348, 349, 352–354, 357, 361, 362, 365, 367, 369–375, 380, 409, 414, 434, 442, 446
- persistent organic contaminants 115
- persistent organic pollutants 47, 53, 120, 127
- Philippines 161, 165, 166, 172, 233–238, 240–243, 245–248, 251–256, 259, 260
- phytoremediation 131, 133
- plant establishment 108, 311, 322, 323, 326
- plant selection 311, 312, 314, 316
- planting 134, 137, 154, 171–175, 177, 225, 229, 252, 300, 302, 311, 313–315, 318, 321–327, 348, 349, 361, 378, 385, 396, 444
- pollution 16, 21, 29, 40, 43, 48, 49, 54, 59, 60, 71, 115, 126, 127, 148, 161, 165, 167, 169–171, 177, 178, 189, 197, 199, 202–204, 206, 209, 211, 213–215, 218, 233, 238, 243, 247, 361, 373, 374, 379, 380, 384, 387,

- 394, 401–405, 407, 410, 413, 414, 435
- polyculture of fish 51
- problems and solutions 177, 230, 245, 348
- protozoa 53, 56, 424, 425, 428
- purification 39, 41, 362, 409, 413, 414
- quality deterioration 27–29
- radial oxygen loss 88
- redox condition 69, 79, 83
- redox potential 72, 95, 101, 106, 107
- reed marsh 35, 36, 41, 43
- restoration 5, 16, 17, 21, 33, 109, 131, 133, 169, 172, 215, 218, 252, 435, 436, 439–444
- rhizosphere 43–45, 87, 88, 90–92, 98, 106, 107, 140
- risk assessment 59, 120, 123, 126
- root hairs 99, 104, 105
- salinity 6, 13, 18, 72, 76, 79, 83, 95
- seagrass 5, 8, 9, 11, 16, 20, 234–238, 240–242, 244–252, 258, 403
- seagrass loss 9, 240
- sediment 6, 8, 10, 14, 17, 20, 47, 58, 71, 72, 76, 79, 81, 83, 97, 115–119, 131–140, 156, 158, 211, 240, 246, 258, 264, 312, 314, 347, 348, 354, 356, 363, 365, 368, 374, 386, 391, 394, 415, 419, 422, 446
- sewage 10, 11, 13, 15, 18–21, 50, 70, 116, 166, 178, 214, 218, 240, 336, 337, 350, 378, 401, 407–410
- simulation model 263, 266, 276
- stormwater management 373, 383, 385
- stormwater treatment 383–387, 393
- subsurface flow 43, 285, 286, 323, 331
- sub-tropical estuarine wetland 69
- Taihu Lake Basin 183, 184, 186, 187, 189, 190, 192, 195, 197, 199, 202–206, 209–211, 215, 217–219
- the Pearl River Delta 49, 54
- tolerance 87, 89–91, 93, 95, 96, 235, 317, 378, 428, 440
- total suspended solids (TSS) 72, 413, 415
- transformations 76, 218, 230, 333, 334, 338, 339, 344
- treatment wetlands 312, 315, 321, 334, 336, 338, 341, 348, 351, 353–357, 361, 375–377, 397
- universal stormwater train 383, 385–387, 393
- urban environment 383, 393
- urban surface runoff 373
- waste recycling and utilization 48
- wastewater treatment 62, 206, 285, 287, 288, 301, 344, 354, 377, 378
- water quality 8, 17, 20, 38, 49, 53, 56, 58, 62, 69, 83, 189, 197, 199, 202, 203, 209, 211, 213, 214, 245, 312, 317, 318, 350, 355, 356, 358, 365, 373, 374, 385, 393, 394, 396, 401, 403, 404, 406, 407, 413, 416, 417, 426, 428, 431, 444, 446
- water replacement rate 35, 37, 38
- water storage capacity 36, 211
- wetland 27–29, 32, 33, 35–39, 43, 45, 46, 49, 69, 87–93, 95–100, 104, 107–109, 114, 119, 145–151, 154, 155, 158, 161, 166, 177, 180, 183, 186, 202, 205, 206, 209, 215, 216, 218, 219, 221, 222, 224, 225, 227, 228, 230, 233, 241, 245, 247, 285–291, 293, 295–299, 301, 302, 307, 311–327, 331–344, 347–358, 361–365, 367–380, 383, 385–387, 393, 394, 396–398, 401–403, 405–407, 409, 411, 413–416, 419, 422, 424–428, 431, 435–437, 439–444
- wetland areas 27, 221, 222, 319, 324, 363, 407, 415
- wetland conservation 149, 233, 405, 435, 436

- wetland creation 435, 436, 441–444, 446
- wetland ecosystems 33, 45, 107, 183, 205, 206, 209, 215, 216, 218, 219, 224, 227, 230, 383, 387, 397, 401, 405, 435, 441, 442, 444, 446
- wetland function 36, 46, 348, 352, 437, 439, 443, 446
- wetland mitigation 435–437, 439–441, 443, 444, 446
- wetland plants 87–93, 95–100, 104, 108, 298, 311–315, 317–321, 326, 327, 336, 355, 356, 373, 407, 441, 443
- wetland resource 27, 28, 32, 247
- wetland restoration 98, 439, 441, 443, 446
- wetland system 288, 293, 301, 337, 338, 347, 361–365, 372, 374, 407, 413–416, 419, 424–426, 428, 431, 440, 441
- Yangtze River 29, 32, 187, 188, 190, 193, 197, 202, 203, 210, 221–223, 225, 230
